

PharmaCote DL

For specialist use within detergent and chloride tablet manufacture

I Holland have developed this new application to reduce the problems that can occur during tablet manufacturing when using sticky and abrasive formulations.

Features

- A replacement for Polymer Inserts where possible
- Good anti-stick properties
- Longer life-span than more commonly used Polymer Inserts
- Can be applied to Punch faces with embossing detail unlike Polymer Inserts

Appearance

- High lustre black colour

Application

- Can be applied to all types of punch face
- Ideal for use when compressing dishwasher and textile tablets

Steel Grades

- HPG-S, HPG-P & HPG-SS

Benefits

- Reduces press down time
- Improves product yield
- Improves corrosion resistance

Due to the many varying parameters in tablet production including environmental conditions and compounds to be compressed these treatments may yield different results.
